## 01. Publish Power BI report with BEXEL Viewer

Power BI report with BEXEL Viewer publisher is available within the Manage ribbon. By clicking on Publish button, different report types will be listed. Chose the desired report and follow the steps below

- Within the Power BI Export wizard, copy the BEXEL Viewer model link, provided while publishing the current model to BEXEL Viewer, using BEXEL Viewer Publisher within BEXEL main menu:

- Check the Auto Load models option to automatically load model sources within the BEXEL Viewer while opening the Power BI dashboard (not recommended for large-scale models)
- After the field with URL Address is filled, click on the Next button and check which created analysis within BEXEL Manager you want to see in the report;
- At the end, press the Finish button and save the Power BI report;
- Open the Power BI report in the Desktop version, and click on the Refresh button.
  - For the online version: click the Publish button to create the online report with an integrated BEXEL Viewer.
  - For desktop version: In order to view the BEXEL Viewer model loaded into the Power BI Desktop application please save the .pbix after the data is refreshed and reopen the .pbix file.
